Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status

Claims 16-20 and 24-32 remain pending.

Response to Arguments

The Applicants arguments filed on June 7, 2005 have been fully considered.

The Examiner states that the indicated allowability of claim 16 has been withdrawn in view on the newly discovered reference Houvener (US Patent 5,657,389).

See following rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoffman et al., (US Patent Application Publication US 2002/0174067) in view of Houvener (US Patent 5,657,389).

As per claim 16

Hoffman et al.,('067) discloses a method for performing secure electronic transactions over a network, said network comprising a user device, and a service provider, said user device having a gatekeeper and a digital fingerprint stored therein, (Figure 1)

Hoffman et al.,('067) does not explicitly disclose said user device sending a request to said provider to obtain a deliverable, which request includes a user identification code associated with said user and known to said provider server, said request initiating the transmission of a pre-arranged handshake and primer to said gatekeeper, whereupon said gatekeeper allows confirmation of said digital fingerprint. Houvener ('389) discloses said user device sending a request to said provider to obtain a deliverable, which request includes a user identification code associated with said user and known to said provider server, said request initiating the transmission of a pre-arranged handshake and primer to said gatekeeper, whereupon said gatekeeper allows confirmation of said digital fingerprint.(Column 3, lines 42-62 [identifier is analogous to handshake.]) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Hoffman et al.,('067) method with the Houvener ('389)method in order to prevent the user from making unauthorized requests..

Art Unit: 3621

Allowable Subject Matter

Claims 17-20 and 24-32 are allowable over the prior art record.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
